- The offered rates for various items should be quoted in BOQ (Bill of Quantities) i.e. Financial Bid (Part-II) in the dedicated column & to be uploaded separately.
9. Special Instructions to the Contractors/Bidders for the e-submission of the bids online through this e Procurement Portal
 1. Bidder should do Online Enrolment in this Portal using the option Click Here to Enrol available in the Home Page. Then the Digital Signature enrolment has to be done with the e-token, after logging into the portal. The e-token may be obtained from one of the authorized Certifying Authorities such as eMudhraCA/GNFC/IDRBT/MtnlTrustline/SafeScript/TCS.
 2. Bidder then logs into the portal giving user id / password chosen during enrollment.
 3. The e-token that is registered should be used by the bidder and should not be misused by others.
 4. DSC once mapped to an account cannot be remapped to any other account. It can only be Inactivated.
 5. The Bidders can update well in advance, the documents such as certificates, purchase order details etc., under My Documents option and these can be selected as per tender requirements and then attached along with bid documents during bid submission. This will ensure lesser upload of bid documents.
 6. After downloading / getting the tender schedules, the Bidder should go through them carefully and then submit the documents as per the tender document; otherwise, the bid will be rejected.
 7. The BOQ template must not be modified/replaced by the bidder and the same should be uploaded after filling the relevant columns, else the bidder is liable to be rejected for that tender. Bidders are allowed to enter the Bidder Name and Values only.
 8. If there are any clarifications, this may be obtained online through the eProcurement Portal, or through the contact details given in the tender document. Bidder should take into account of the corrigendum published before submitting the bids online.
 9. Bidder, in advance, should prepare the bid documents to be submitted as indicated in the tender schedule and they should be in PDF/XLS/RAR/DWF formats. If there is more than one document, they can be clubbed together.
 10. The bidder reads the terms and conditions and accepts the same to proceed further to submit the bids
 11. The bidder has to submit the tender document(s) online well in advance before the prescribed time to avoid any delay or problem during the bid submission process.
 12. There is no limit on the size of the file uploaded at the server end. However, the upload is decided on the Memory available at the Client System as well as the Network bandwidth available at the client side at that point of time. In order to reduce the file size, bidders are suggested to scan the documents in 75-100 DPI so that the clarity is maintained and also the size of file also gets reduced. This will help in quick uploading even at very low bandwidth speeds.

13. It is important to note that, the bidder has to Click on the Freeze Bid Button, to ensure that he/she completes the Bid Submission Process. Bids Which are not Frozen are considered as Incomplete/Invalid bids and are not considered for evaluation purposes.
14. In case of Offline payments, the details of the Earnest Money Deposit(EMD) document submitted physically to the Department and the scanned copies furnished at the time of bid submission online should be the same otherwise the Tender will be summarily rejected
15. The Tender Inviting Authority (TIA) will not be held responsible for any sort of delay or the difficulties faced during the submission of bids online by the bidders due to local issues.
16. The bidder may submit the bid documents online mode only, through this portal. Offline documents will not be handled through this system.
17. At the time of freezing the bid, the eProcurement system will give a successful bid updation message after uploading all the bid documents submitted and then a bid summary will be shown with the bid no, date & time of submission of the bid with all other relevant details. The documents submitted by the bidders will be digitally signed using the e-token of the bidder and then submitted.
18. After the bid submission, the bid summary has to be printed and kept as an acknowledgement as a token of the submission of the bid. The bid summary will act as a proof of bid submission for a tender floated and will also act as an entry point to participate in the bid opening event.
19. Successful bid submission from the system means, the bids as uploaded by the bidder is received and stored in the system. System does not certify for its correctness.
20. The bidder should see that the bid documents submitted should be free from virus and if the documents could not be opened, due to virus, during tender opening, the bid is liable to be rejected
21. The time that is displayed from the server clock at the top of the tender Portal, will be valid for all actions of requesting bid submission, bid opening etc., in the e-Procurement portal. The Time followed in this portal is as per Indian Standard Time (IST) which is GMT+5:30. The bidders should adhere to this time during bid submission.
22. All the data being entered by the bidders would be encrypted at the client end, and the software uses PKI encryption techniques to ensure the secrecy of the data. The data entered will not be viewable by unauthorized persons during bid submission and not viewable by any one until the time of bid opening. Overall, the submitted bid documents become readable only after the tender opening by the authorized individual.
23. During transmission of bid document, the confidentiality of the bids is maintained since the data is transferred over secured Socket Layer(SSL) with 256 bit encryption technology. Data encryption of sensitive fields is also done.
24. The bidders are requested to submit the bids through online eProcurement system to the TIA well before the bid submission end date and time (as per Server System Clock).

The result is the production of fine waveform that creates a resistance in the tissue which in turn results in coagulation, where the hyper evaporation will destroy the tissue. The process provides the ability of the removal of surface structures without causing any damage to deep or peripheral tissues and this also cauterize large surface areas quickly when required. • Fulgurate - The sparking in tissue leads towards coagulation. There is no direct contact between tissue and electrode but the voltage is raised to create a spark between the electrodes which in turn coagulate the the tissues in between the process. • Desiccate - The desiccation is the mode where the active electrode is in direct contact with tissue for coagulation process. This type of coagulation process is used in most of surgeries and assure pinpoint desiccation with less damage to peripheral tissues. • Bipolar : • Bi-coag : For privations of carbonization and highly precise control over coagulation process • Bi-cut : Eliminates excessive current, even during precision cutting in minute tissue structure • Auto mode : Initiate coagulation by pressing the foot switch and automatically stops output and audio signal after coagulation • Seal : Creates vessel fusion with a unique combination of pressure and energy and left no material behind after the process • Specifications : • Program mode : 99 User settable program mode • Frequency : 480khz • Display : 7segment LED • Weight : 7.5Kg (approx) • Dimension : 410mm(L) x 355mm(W) x 155mm(H) • Voltage : Input Supply Voltage 230V (+ / - 15%) 50Hz <p>Sealing Accessories :</p> <ul style="list-style-type: none"> • Vessel- Seal
